

# KAESARO BOARD WASHER

## For clean boards

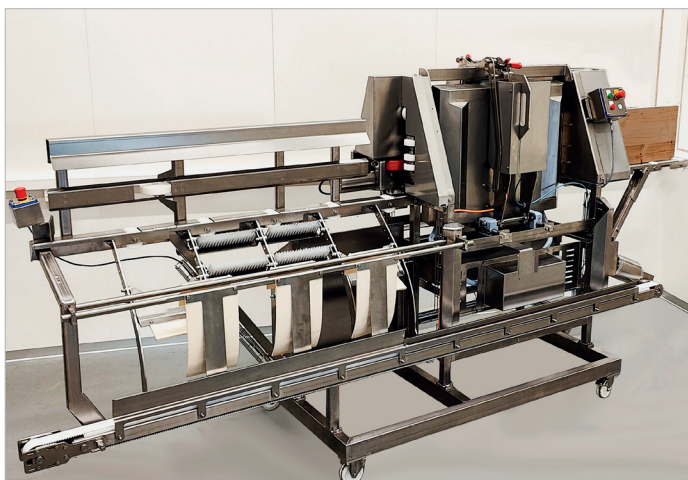

### Ideal for effective production optimisation

Due to its mobility the KAESARO board washer can be used in different locations.

The dirty boards are fed into the machine by a conveyor belt. All four board sides are gently cleaned by special brushes. The cleaned boards are transported back to the operator by the conveyor belt.

The board washer can be easily connected to the water supply.

It is made of high-quality chrome-steel and food-safe plastics and therefore easy to clean.

### Options:

- Recirculation pump for minimal water consumption
- Medium pressure (20 bar)
- High pressure (180 bar)

### Specifications

- Performance: approx. 400 boards per hour (depends on degree of soiling)
- Board washer: 3'929 x 1'175 x 1'045 mm
- Boards: 1'100 - 1'500 x to 355 x 10 - 30 mm
- Machine weight: approx. 489 kg
- Energy supply: 3 x 400 V / 16 A

### Your benefits at a glance:

- Time saving compared to hand washing
- Reduced water consumption due to optimised cleaning process
- Simple and safe operation by one person
- Long service life of boards because of gentle cleaning
- Clean boards always ready for use
- Emergency stop switch for optimal user protection
- Mobile
- Easy cleaning and maintenance
- Thorough cleaning thanks to use of high water pressure and special brushes
