

KAESARO[®] App

Cheese care robot monitoring app

Facilitates the monitoring of KAESARO cheese care robots with a smartphone

With the KAESARO App, monitoring your KAESARO cheese care robots is easy with a smartphone. Current process data is accessible at all times and a push notification is sent in the event of faults. If the KAESARO Manager is installed at the customer, the entire cheese cellar is also displayed graphically on the smartphone. Cellar management and job management functions are also available.

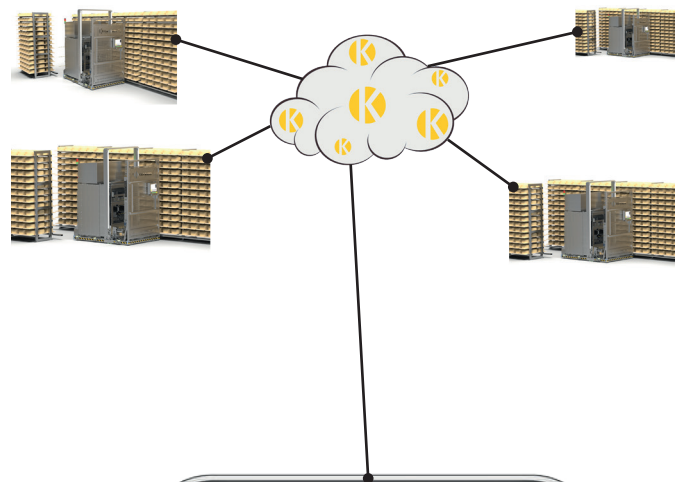

Functions
